Professional Summary

Unity Developer and Technical Artist with 2+ years of experience working on PC, mobile, VR, and AR projects. Strong background in C# programming, gameplay systems, shader development, and real-time performance optimization in Unity. Experienced in building scalable gameplay features, working with Shader Graph, Scriptable Objects, and FSMs, and improving performance through techniques such as LODs, Occlusion Culling, and Frustum Culling. Also experienced in VR development for Meta Quest 3, AR projects with Vuforia, and maintaining live production environments. Focused on creating efficient technical solutions that support gameplay, visual quality, and performance.

Core Skills

Unity · C# · Gameplay Programming · Technical Art · Shader Graph · Performance Optimization · Scriptable Objects · Finite State Machines (FSM) · VR Development · AR Development · Vuforia · Meta Quest 3 · Real-Time Rendering · LODs · Occlusion Culling · Frustum Culling · Git

Additional Tools

Unreal Engine · Java · Spring Boot · MySQL · Android Builds

Professional Experience

Arcadio Lab

Unity Programmer | Technical Artist

July 2024 – September 2025 | Barcelona

- Developed and maintained gameplay systems in Unity within a multidisciplinary team following Scrum methodologies.
- Implemented new features and resolved bugs in an active production environment.

- Created shaders and visual effects using Shader Graph to support both visual quality and runtime performance.
- Optimized scenes and real-time performance to improve stability, efficiency, and overall user experience.

Forged Horizon

Unreal Engine VR Technical Artist | Programmer

September 2023 – June 2024 | Barcelona

- Configured realistic lighting setups in Unreal Engine to improve immersion and visual quality in VR environments.
- Optimized materials and shaders using instancing techniques to reduce draw calls and improve real-time performance on VR hardware.
- Applied technical art workflows to balance visual fidelity and performance efficiency in interactive VR experiences.
- Focused on VR optimization to achieve stable frame rates across different devices and platforms.
- Awarded Best Project of the Year at Deia Escola d'Art i Disseny (2024).

Grupo 3 Studio

Unity Programmer | Technical Artist

September 2022 – July 2023 | Barcelona

- Designed and implemented mission and dialogue systems in Unity using Scriptable Objects to support scalability and maintainability.
- Developed a player controller with Unity's New Input System and Finite State Machine (FSM) architecture to manage player actions and animations.
- Improved gameplay architecture to reduce bugs, speed up iteration, and support smoother collaboration with designers and developers.
- Built scalable gameplay systems and polished mechanics that allowed the project to grow efficiently with new features.
- Awarded Best Project of the Year at Deia Escola d'Art i Disseny (2023).

Selected Projects

A non-farming game

Unity Developer

2023 – 2024

- Built mission and dialogue systems using Scriptable Objects.
- Developed a player controller using Unity's New Input System and FSM architecture.
- Implemented enemy AI and boss fight mechanics.

- Optimized graphics using LODs, Occlusion Culling, and Frustum Culling.
- Created a dynamic day/night cycle system.

I.P.O.D. Atrapamonstres

Unity AR Developer

2025

- Developed and integrated AR features in Unity using Vuforia for a live, published mobile project.
- Implemented gameplay features and fixed issues in an active production environment.
- Prepared, tested, and maintained Android builds across different devices.
- Created VFX and visual feedback to improve clarity and responsiveness of player interactions.
- Used Unity Cloud services and SQL-based data workflows to manage player data, persistence, and tracking.
- Balanced visual quality with mobile performance constraints to improve stability and usability on real devices.

Golden Hand

Unreal VR Developer

2024 – 2025

- Developed VR mechanics in Blueprints, including climbing, archery, and escape-room-style puzzles.
- Optimized performance for Meta Quest 3.
- Set up realistic lighting and material instancing for immersive VR environments.

Education

IT Academy de Barcelona Activa

Specialization Course in Java Spring Boot Development

September 2025 – January 2026

Deià Escola d'Art i Disseny

Advanced Vocational Training in Audiovisual Graphics – Virtual Reality and Gamification

September 2023 – June 2024

Deià Escola d'Art i Disseny

Advanced Vocational Training in Audiovisual Graphics – Video Games and Virtual Environments

September 2020 – June 2023
